

Business Case - Data Analyst

Congratulations! You have been selected to be the data analyst for the most important cinema in the city for a cinema chain. The directors' eyes are on you.

The good news is: You have many customers! The bad news is: your performance is low, there are operational problems, and the shopping mall is pressuring you to stop operating your last cinema session, as it ends 1 hour after the mall closes.

Now you must present a recovery plan to your directors. You need to increase revenue by 20% for the current year.

They are busy, so you will only have 45 minutes to present the plan. Your goal is to leave the meeting with approval.

Relevant Data

- **Customer Data:** Include data on customer demographics, ticket sales, peak hours, and customer feedback.
- **Operational Data:** Present data on staff performance, adherence to procedures, and operational inefficiencies.
- **Financial Data:** Provide revenue, cost, and profitability data, especially focusing on the food area and the last cinema session.
- **Market Data:** Include data on industry trends, competitor performance, and market conditions.

📌 Business Case - Data Analyst (GCC)

Case Guidelines and Tips:

Your presentation **MUST** cover the following topics. If you wish, feel free to add more things.

1. **Business Review:**
 - **Data Analysis:** Analyze current numbers, trends, and KPIs. What insights can you gather from the data provided?
 - **Visualization:** Present your findings using charts, graphs, and other data visualization tools to make the information clear and impactful.
2. **Execution:**
 - **Operational Improvements:** Identify key areas of improvement based on data analysis. What strategies would you recommend to ensure flawless execution and operational discipline?
 - **KPIs and Monitoring:** Suggest key performance indicators and how you would use them to monitor and improve operations.
3. **Negotiation:**
 - **Data-Driven Argumentation:** Use data to build a case for maintaining the last cinema session. How will you present this data to the mall management to persuade them?

- **Strategic Plan:** Outline a plan for approaching the mall management, including potential compromises or alternative solutions.
- 4. **Technical Skills:**
 - **Data Tools:** Indicate which data analysis and visualization tools you used (e.g., Excel, Python, R, Tableau).
 - **Methodology:** Explain your analytical methodology, including any statistical or machine learning techniques used.
- 5. **Communication:**
 - **Presentation Skills:** Demonstrate your ability to present complex data in an understandable and convincing manner.
 - **Report Writing:** Provide a concise, written report summarizing your analysis and recommendations.

Purpose of the Exercise:

The purpose of this exercise is not to assess if you really know how to run a cinema but to understand your analytical thinking, data handling capabilities, operational discipline, and negotiation skills.

Any questions or doubts, feel free to contact us!

¡Have fun!
